The portal to know about national and international scholarships is a valuable resources for students who are seeking funding oppertunities to support their education. The portal provides comprehensive information on scholarships offered by various organizations, including government agencies, private foundations, and academic institutions.The portal offers of scholarship opportunities, which can be searched based on various criteria such as

level of study, field of study, and eligibility requirments. The portal also provides guidence on the application process.The portal is build to overcome the problems faced by the students during applying for scholarships.It gives idea about for the eligibility and how to apply. It doesn't require more time to search, everything will be provided their itself.

EXISTING SYSTEM

The existing systems is NSP National Scholarship Portal which provides information unclear to understand and they provide information about certain scholarships only for national level and provides many link to apply.

Many other websites like e-pass are their which provides certain information about scholarships, but it is up to school level and graduation but not for further education.

Scholarships.com is the website which provides information about the scholarships with the links provided, but this website takes lot of time to search for the right scholarship for their eligibility.

KEY OBJECTIVES

1. This portal is used to know the clear information about the scholarships.
2. The main purpose of this portal to give the exact information to the users who does not know to apply for the eligible scholarships.
3. It has built with existing resources to give an idea to the users.
4. This portal mostly useful to the students for their higher studies.

PROPOSED SYSTEM

This portal is developed by using web development. Different features are :-

1. **Searce function:**
   This portal have a search function that allows users to find scholarships that match their criteria, such as their field of study, academic level, location, and eligibility criteria.

2. Scholarship listings:

This portal should have a comprehensive list of national and international scholarships with details about each scholarship, such as name of the scholarship, the organization and eligibility criteria.

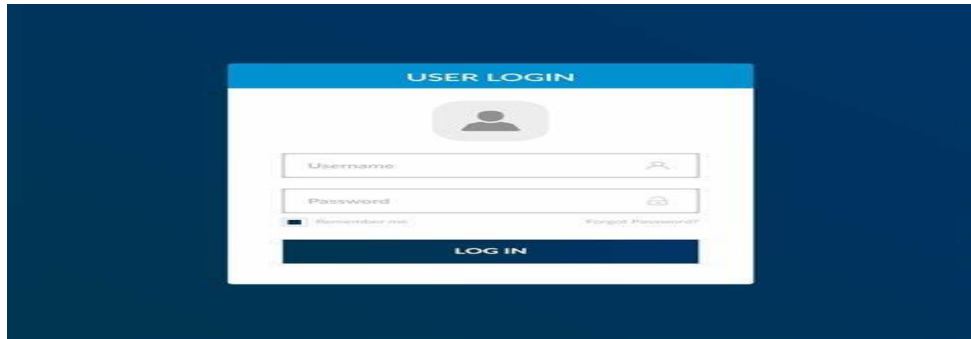

3. Web Development:

This portal is built by using web development, such as html, css, and java script. By using this it can be easy to serch and apply for the scholarships.

4. **Login form:**
   A login form is a user interface elements that allows users to gain access to the portal. Here are some common elements and best practices for designing login form are
   - ➢ User identification
   - ➢ Password field
   - ➢ Forgot password
   - ➢ Error messages
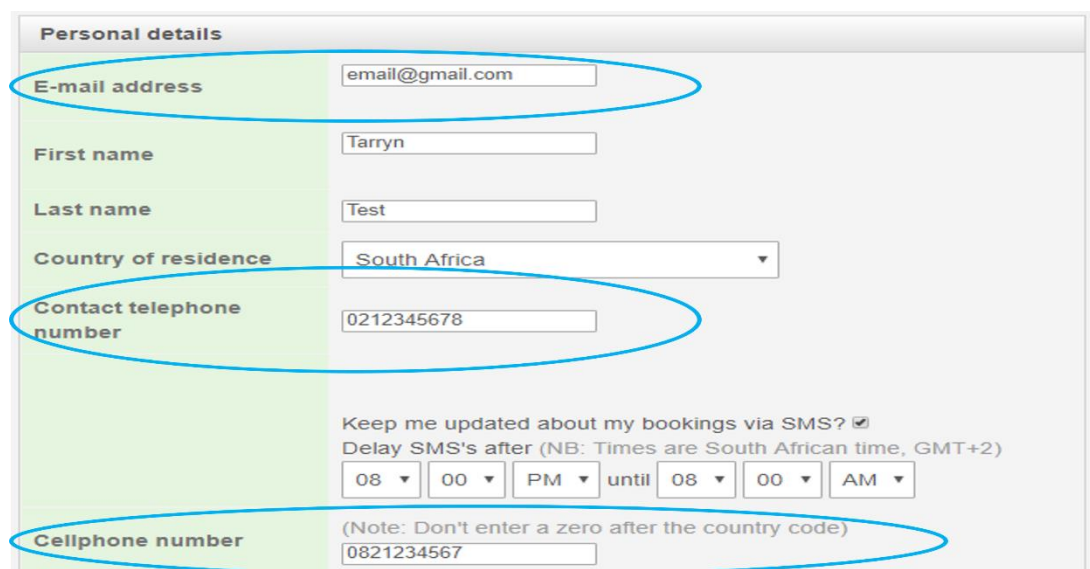

5. Details form:
   In the details form it as the personal information like
   - ➢ First name
   - ➢ Last name
   - ➢ E-mail
   - ➢ Phone no
   - ➢ Category
   - ➢ Caste

LIMITATIONS

➢ This portal will not work without internet
➢ This provides information about the certain scholarships which are useful for the students
➢ It require internet browser to search for the scholarships

SCOPE OF THE PROJECT

This portal should be more useful for the all eligible students. Some of that are

1. **School students:**
   The students who are in high school education, they are eligible for the scholarships for their furthur studies and also they can get merit schalrship based on the performance and scores obtained.
2. **College students:**
   This portal will help the students who are eligible for the scholarships to pursue their higher education in national and international level. The user should give the details it will be considered and according their eligibility they get the mail.
